Monitor Audio Silver 500 7G

THE HEAVY-HITTER IN Monitor Audio's seventh-generation Silver Series, this three-way floorstander is perfect for anyone seeking a largescale, full-range listening experience. A pair of 200mm C-CAM bass drivers are joined by all-new tweeter and midrange designs, plus a revised crossover, in a modern-looking rear-ported cabinet. Cue the music and the feeling is one of warm, room-filling bass, an evocative midband and crisp, clear highs. There's also a wide, deep soundstage to dive into, while another feather in its cap is driving ability – this loudspeaker seems to expend no effort at all when you pump up the volume. Take the ticket price into account, and Monitor Audio's Silver 500 7G is nothing less than an absolute steal.
